CLAUDE SKILL

Logo Designer

Logo Designer is a Claude skill that creates a small logo system for any business and delivers it as live, editable artboards on a Claude Design canvas.

Each request produces three artboards:

- a primary logo
- a reversed-color logo for dark or brand-colored backgrounds
- a standalone logo mark for favicons, app icons and avatars.

Triggers: requests for a logo, wordmark, brand mark or reversed/white logo version, or a logo made in Claude Design.

Not for: editing an existing raster logo file, or creating full brand-guideline documents.

Test Prompt - create a logo for clothing brand KNOTRA

- **Without skill -** Claude generated a basic logo concept with minimal design details.

- **With skill** - Claude generated a complete logo system on a Claude Design canvas, including a primary logo, a reversed-color logo for dark backgrounds, and a standalone logo mark suitable for favicons, app icons, and avatars. The output was editable and organized into separate artboards.
